

CS2100 Computer Organisation
AY2021/22 Semester I
Assignment 1 [ANSWER SHEET]

FULL NAME:	Papattarada Apithanongsiri
STUDENT ID: E.g., <AxxxxxxY>	A0222677Y
TUTORIAL GROUP:	T02

QUESTION 0. SUBMISSION INSTRUCTIONS (3 MARKS)

a. Ensure that you name your file <AxxxxxxY>.pdf, where AxxxxxxY is your matric number. (1 mark)	<input checked="" type="radio"/> Y / <input type="radio"/> N
b. Ensure that you submit your assignment as a single PDF file. (1 mark)	<input checked="" type="radio"/> Y / <input type="radio"/> N
c. Ensure that your assignment submission has your tutorial group number, student ID and name	<input checked="" type="radio"/> Y / <input type="radio"/> N

QUESTION 1. COMPLEMENT NUMBER SYSTEMS (10 MARKS)

Q1.a	$-m = (4)_{10}^n - m$
Q1.b	(i) 10001111 ₂ (ii) 11001100 ₂
Q1.c	(i) 101331 ₄ (ii) 12130 ₄
Q1.d	$ \begin{aligned} -1149_{10} &= (4)_{10}^6 - (1149)_{10} \\ &= 4096_{10} - 1149_{10} \\ &= 2947_{10} \\ &= 232003_{45} \text{ (4's complement representation)} \end{aligned} $ $ \begin{aligned} -412_{10} &= (4)_{10}^6 - 412_{10} \\ &= 4096_{10} - 412_{10} \\ &= 3684_{10} \\ &= 321210_{45} \text{ (4's complement representation)} \end{aligned} $
Q1.e	$ \begin{aligned} 1149_{10} - 412_{10} &= 1149_{10} + (-412)_{10} \\ &= (101331)_{45} + (321210)_{45} \\ &= (023201)_{45} \end{aligned} $ $ \begin{aligned} 1149_{10} - 412_{10} &= 737_{10} \\ (0023201)_4 &= 737_{10} \end{aligned} $ $ \therefore 1149_{10} - 412_{10} = (023201)_{45} $

QUESTION 2. REAL NUMBERS (11 MARKS)

Q2.a	(i)	<div>integer part fraction part</div> <div>0 1 1 ... 1 . 0 ... 0</div> <div>m-1 bits 16-m bits</div> <div>$2^{m-1} - 1$</div>									
	(ii)	<div>integer part fraction part</div> <div>1 0 0 0 ... 0 0 . 0 0 0 ... 0 0</div> <div>m-1 bits 16-m bits</div> <div>-2^{m-1}</div>									
	(iii)	<div>integer part fraction part</div> <div>0 0 0 ... 0 0 . 0 0 0 ... 0 1</div> <div>m bits 15-m bits</div> <div>2^{m-16}</div>									
Q2.b	<table><tr><th>m</th><th>Most positive integer</th><th>Most negative integer</th><th>Smallest positive value</th></tr><tr><td>4</td><td>7</td><td>-8</td><td>0.00024414062 (2^{-12})</td></tr></table>			m	Most positive integer	Most negative integer	Smallest positive value	4	7	-8	0.00024414062 (2^{-12})
m	Most positive integer	Most negative integer	Smallest positive value								
4	7	-8	0.00024414062 (2^{-12})								
Q2.c	<table><tr><th>Most positive value</th><th>Most negative value</th><th>Smallest positive value</th></tr><tr><td>1.996×2^{64}</td><td>-1.996×2^{64}</td><td>1.000×2^{-63}</td></tr></table> <p>more precise representation of float values as compared</p>			Most positive value	Most negative value	Smallest positive value	1.996×2^{64}	-1.996×2^{64}	1.000×2^{-63}		
Most positive value	Most negative value	Smallest positive value									
1.996×2^{64}	-1.996×2^{64}	1.000×2^{-63}									
Q2.d	<p>Advantage: to floating point representation. Floating point representation has a wider representable range</p> <p>Disadvantage:</p>										

→ various implementation of floating point representation which may not be compatible to each other and is bound to error

→ operations are more time consuming as compared to fixed-point representation

QUESTION 3. C and Assembly Programming (8 MARKS)

Q3.a	$\text{XOR } \$s0, \$s0, \$t1$
Q3.b	<p>31 iterations</p> $2 + 6(31) + 1 + 1 = 190$
Q3.c	<pre> #include <stdio.h> int main(void) { int to = data; unsigned int t1 = 0x80000000; int t2; while (to != 0) { t2 = to / 2; # copy LSB if (t2 != 0) { data = data ^ t1; } to >>= 1; } data = data ^ t1; return 0; } </pre>

QUESTION 4. INSTRUCTION ENCODING (8 MARKS)

Q4.a	base address: \$3 numelement: 10 add 1 to all the elements in the array																								
Q4.b	$2 + 6(10) = 62$																								
Q4.c	(Provide encodings only for the four instructions in <u>bold and underline.</u>) <table><tr><th>Label</th><th>Instruction</th><th>Hexadecimal Encoding</th></tr><tr><td></td><td><u>addi \$4, \$3, 40</u></td><td>0x20640028</td></tr><tr><td></td><td>addi \$5, \$3, 0</td><td rowspan="3"></td></tr><tr><td>loop:</td><td>lw \$6, 0(\$5)</td></tr><tr><td></td><td>addi \$6, \$6, 1</td></tr><tr><td></td><td><u>sw \$6, 0(\$5)</u></td><td>0xACA60000</td></tr><tr><td></td><td>addi \$5, \$5, 4</td><td rowspan="2"></td></tr><tr><td></td><td><u>slt \$6, \$5, \$4</u></td></tr><tr><td></td><td><u>bne \$6, \$zero, loop</u></td><td>0x14C0FFFA</td></tr></table>	Label	Instruction	Hexadecimal Encoding		<u>addi \$4, \$3, 40</u>	0x20640028		addi \$5, \$3, 0		loop:	lw \$6, 0(\$5)		addi \$6, \$6, 1		<u>sw \$6, 0(\$5)</u>	0xACA60000		addi \$5, \$5, 4			<u>slt \$6, \$5, \$4</u>		<u>bne \$6, \$zero, loop</u>	0x14C0FFFA
Label	Instruction	Hexadecimal Encoding																							
	<u>addi \$4, \$3, 40</u>	0x20640028																							
	addi \$5, \$3, 0																								
loop:	lw \$6, 0(\$5)																								
	addi \$6, \$6, 1																								
	<u>sw \$6, 0(\$5)</u>	0xACA60000																							
	addi \$5, \$5, 4																								
	<u>slt \$6, \$5, \$4</u>																								
	<u>bne \$6, \$zero, loop</u>	0x14C0FFFA
